QUALITY CONTROL SYSTEMS

## About us

**Your elevator, our service**  
IAES offers Passenger and Cargo Elevators.

Our certified team of experts and technicians, from UAE and China, is responsible and devoted. Elevator Control systems abide by European standards EN81, making your experience with us reliable.

We also have semi-imported elevators with different control systems and specifications.

Our services include installation and monthly maintenance of elevators, escalators, moving walkways and dumbwaiters, especially aiming to maintain the elevator performance and safety.

IAES deals in different type of elevators such as:

BUILDINGS	FACTORIES	AIRPORTS
OFFICES	SHOPPING MALLS	RESTAURANTS
HOTELS	CUSTOM MADE	

We also modernize and upgrade old and faulty elevators in reasonable prices.

In addition, spare parts, troubleshooting and online support from manufacturer are provided for our clients from all over Pakistan.

We also perform elevator inspections for smooth lift operation. The quality of the elevators and needs of our customers are our priorities.

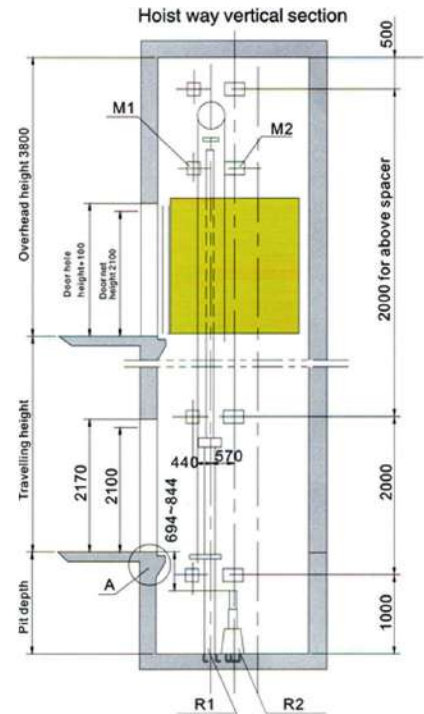

QUALITY CONTROL SYSTEMS

## Our Services

### Installation

Our project management and installation team help our customers through the entire installation process. Our technicians communicate to our customers and discuss the project with them to accurately scope, design and plan to obtain the best results.

Our team will ensure that the transition from planning to installation of the product stays smooth.

### Maintenance

In our Service-contract agreement we offer monthly maintenance program which includes oiling, cleaning and troubleshooting of the elevator parts prioritizing client satisfaction.

During our maintenance period, we also perform elevator inspections for smooth & safe functioning of the elevators.

Our troubleshooting and maintenance services are also available for the units that are not installed by IAES, but are in need of reliable service providers.

### Modernization / Replacement

Our modernization gives new look to the elevators with smoother and safer performance. We own a professional team for high-quality upgradation of faulty and old lifts.

Our modernization will boost your elevator's performance, eco-efficiency, comfort, and appearance with our solutions catering to all needs. It also increases product reliability in compliance with safety standards which saves the customers worries.

We modernize all types and sizes of elevators with gear and gearless motors, as well as MRL elevators. This includes either upgrading the whole elevator by replacing it with a new one or switching its control system with an advanced one.

### Elevators

VVVF drive Inverter Technology ensures smooth start and quick and quiet Moving. Its noise control brings passenger peaceful riding experience.

The start, acceleration and brake curves are designed according to the ergonomic theory to get the right comfort for the users.

We can provide passenger & cargo lifts with different sizes and capacities.

Elevator spare parts are also available.

### Escalators

The diversified outlook design remarkably merges itself into one integrated mass that serves the passengers secure, reliable, simple and prompt transport means.

Our escalators are energy-efficient and strong possessing extraordinary features. The elegant stainless steel floor plate reflects three-dimensional effect. The inner and outer decks are also made of stainless steel.

Escalator's VVVF drive ensures that the escalator operates more smoothly and with noise control features.

### Moving walkways

Customer can choose VVVF drive to control running speed of the moving walkways, the energy-efficient function of the walkways is manifest.

Even when moving with a loaded cart, it starts smoothly. The overall design is smooth, safe and visually appealing.

Specially designed stable handrail drive, with big wheels, operates with low noise and more power which provides a better experience and convenience to the users.

### Dumbwaiters

Its small volume, and smooth delivery at reasonable prices make it desirable for a wide range of uses.

Our dumbwaiter is used for diverse functions in restaurants, factories, libraries etc.

The acceleration and brake curves are designed in a way to get a secure delivery.
